LeetCode

Summary

Full Stack Developer specializing in MERN applications, AI integrations, and scalable backend systems. Built CareerSync, a recruitment platform with resume intelligence, automated interview workflows, and AI-powered career guidance. Experienced in developing production-ready applications using React.js, Node.js, MongoDB, and Generative AI technologies. Pursuing B.E. in Computer Engineering with a CGPA of 9.59.

Education

B.E. Computer Engineering — Fourth Year

Trinity Academy of Engineering, Pune

Expected 2027

CGPA: 9.59 / 10

Skills

Programming & Querying: C++, Python, JavaScript

Frontend: React.js, HTML, CSS, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT, Socket.IO

Database: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Cloudinary

Experience

Web Development Intern

Dec 2025 – Feb 2026

EYJDS (Hybrid)

Tools: React.js, Node.js, MongoDB, Tailwind CSS, REST APIs, Git

- Contributed to a full-stack job portal that enables users to search, filter, and apply for jobs through a fully responsive **React.js** and **Tailwind CSS** interface.
- Developed and optimized backend **RESTful APIs**, implementing authentication, dynamic job listings, and application workflows with secure data handling and efficient server-side logic.
- Deployed production-ready builds on **Render**, optimizing performance, load times, and user experience.

Projects

CareerSync Platform | React.js, Node.js, MongoDB, Tailwind CSS, Adzuna API [Live](#) | [Frontend](#) | [Backend](#)

- Architected a **MERN-based recruitment platform** integrating AI-powered resume intelligence, job management, and automated interview workflows through secure **microservice communication**.
- Integrated GuruAI, a **resume intelligence engine** that parses PDF resumes, generates **ATS insights**, and answers contextual resume queries through a conversational AI interface.
- Engineered secure **JWT authentication**, email verification workflows, and scalable **REST API integrations** for unified job discovery and application management.

InterviewPilot | React.js, Node.js, MongoDB, Gemini API [Live](#) [GitHub](#)

- Built an **AI-powered mock interview platform** that conducts context-aware technical interviews tailored to users' resumes and target job roles using the **Gemini API**.
- Developed a **video interview pipeline** using MediaRecorder API, **AssemblyAI transcription**, and Gemini-based answer evaluation.
- Designed **shared JWT auth** with CareerSync for unified session and profile data across both platforms.

GuruAI | React.js, Node.js, MongoDB, Google Gemini API, Tailwind CSS [Live](#) [GitHub](#)

- Created a specialized **AI Career Consultant** for CareerSync, delivering personalized roadmaps and resume optimization through advanced **Prompt Engineering** and **System Identity Design**.
- Implemented **multi-key Gemini rotation** with fallback logic to sustain availability under free-tier rate limits.
- Implemented **JWT auth**, **OTP verification**, and synchronized MongoDB data across CareerSync.

Achievements/Activities

- Achieved **10.0 SGPA** in First Year of B.Tech (Computer Engineering).
- Selected at Institute Level in Smart India Hackathon (SIH) as part of a competitive team.
- Attended workshops on Python, Generative AI, and ChatGPT conducted by GeeksforGeeks.
